Campaign Spend vs. Attributed Revenue

Response Rate by Campaign Channel

Performance Summary:

Across 2,240 leads and \$12.36M total spend, the funnel delivered \$1.13M in attributed revenue (27.19% average response).

Channel Divergence:

Direct Mail (53.0%) and Paid Social (40.3%) drove the strongest engagement, outperforming Email (8.7%) by more than 4x.

Campaign Impact:

NovaPulse Launch proved most lucrative (\$394.2K revenue), while NovaEdge Awareness lagged (\$34.3K revenue).

Strategic Recommendation:

Rebalance \$500K+ from broad email/awareness campaign into high-converting partner and direct mail channels.

Total Closed Deals

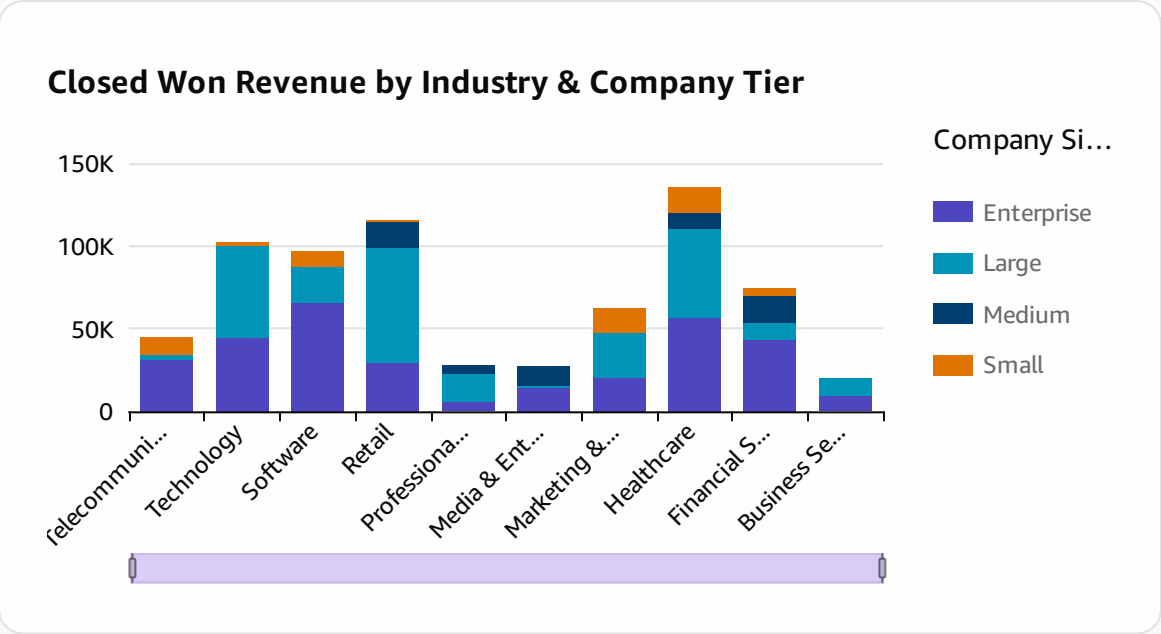

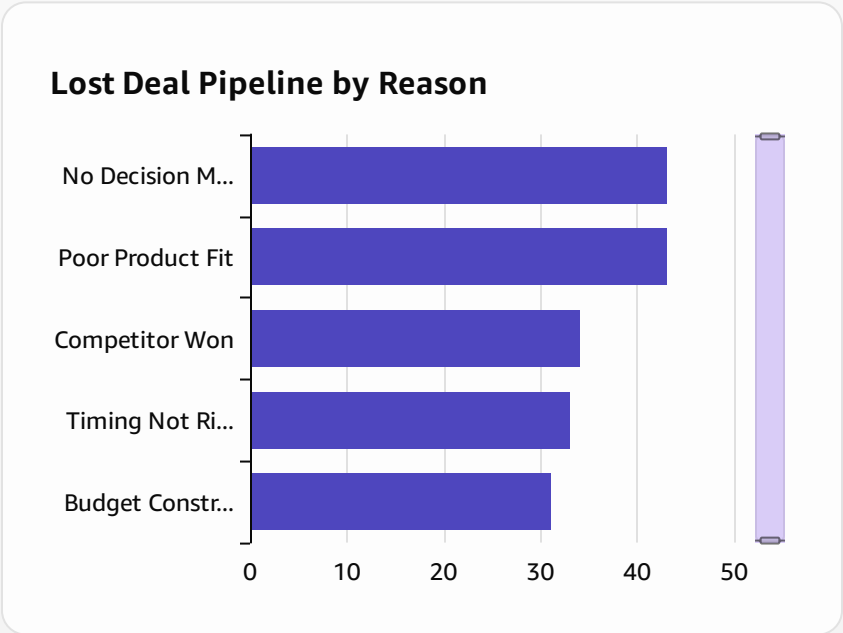

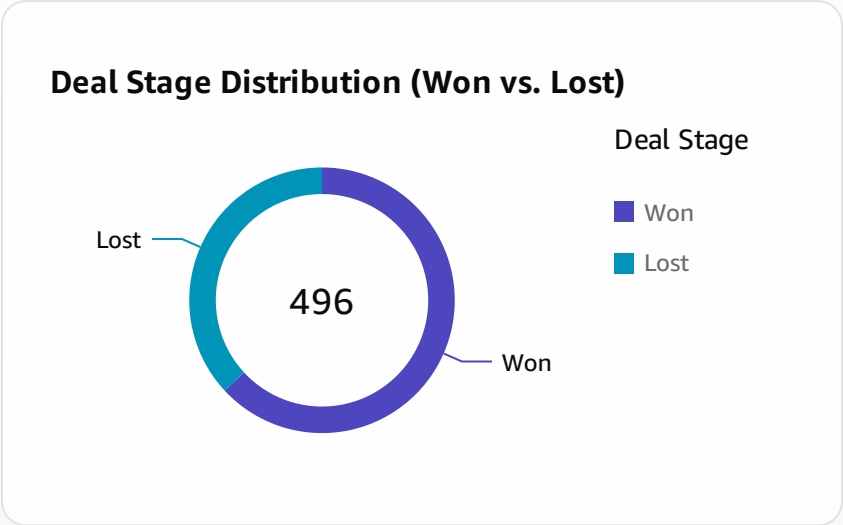

499

Overall Win Rate

63.13%

Average Sales Velocity

67 days

**Performance Summary:**  
Across **499 total deals**, the sales pipeline delivered **\$0.71M** in closed won revenue with an overall **63.13%** win rate and an average sales velocity of **67 days**.

**Segment Divergence:**  
**Enterprise** tier accounts delivered the largest average contract values, but exhibited longer sales cycles compared to **Mid-Market** and **SMB** accounts, which closed faster with higher win predictability.

**Pipeline Loss Impact:**  
Out of **184** lost deals, **Pricing** and **Feature Gap** represented the primary drivers of lost pipeline value, stalling late-stage opportunities in key enterprise product lines.

**Strategic Recommendation:**  
Implement an executive deal-desk approval workflow for enterprise pricing concessions and arm account executives with competitive battle cards to counteract the primary loss drivers.

Cross-Functional View: Closed Deal Value vs. Support Resolution Time by Industry

| Industry                | Enterprise | Large | Medium | Small | Resolution Time (hours) |
|-------------------------|------------|-------|--------|-------|-------------------------|
| Telecom                 | 1000       | 800   | 1200   | 1800  | 60                      |
| Technology              | 1200       | 1200  | 1500   | 800   | 55                      |
| Software                | 2200       | 1400  | 1800   | 1900  | 65                      |
| Retail                  | 1400       | 1400  | 1800   | 200   | 58                      |
| Professional Services   | 600        | 1400  | 900    | 100   | 55                      |
| Media & Entertainment   | 1100       | 200   | 800    | 100   | 60                      |
| Marketing & Advertising | 1300       | 1600  | 1800   | 1900  | 65                      |
| Healthcare              | 4000       | 1600  | 2100   | 1900  | 60                      |
| Financial Services      | 1800       | 700   | 1800   | 900   | 55                      |
| Business Services       | 1900       | 700   | 1800   | 100   | 55                      |

Performance Summary:

Across **3,000 support tickets**, the team recorded an average resolution time of **58.2 hours** with **65.1% neutral**, **22.8% negative**, and **10.1% positive** customer sentiment.

Tier & Severity Divergence:

**Critical priority** incidents count for **50 tickets (1.67%)**, with critical issues in **Analytics Dashboard** averaging over **102 hours** to resolve, substantially exceeding the baseline SLA across other product areas.

Cross-Functional Impact:

The unified dataset demonstrates that **Enterprise tier** accounts logged **757 tickets (25.5% negative sentiment)**, elongated resolution times and downtime in key technical areas directly threaten account retention and late-stage renewal negotiations on the Sales Pipeline.

Strategic Recommendation:

Establish a dedicated Tier-3 escalation workflow for Analytics Dashboard and Authentication outages to cap enterprise resolution times under 24 hours and protect high-value ARR renewals.
